7406565723

Summary

Third-year Computer Science engineering student at M.S. Ramaiah University of Applied Sciences with a CGPA of 9.70 and hands-on experience in machine learning and full-stack web development through internships and practical projects. Proficient in programming fundamentals and web technologies, with a strong interest in building intelligent, scalable software solutions and AI-driven applications.

Education

Ramaiah University of Applied Sciences

Computer Science • Banglore, Karnataka 12/2028

Awarded a merit-based scholarship for undergraduate studies based on academic performance in the Higher Secondary (Class XII / PUC) examinations.

MES Prof BR Subba Rao PU College

PCMB • Banglore, Karnataka 03/2024

Achieved 96.16% in the Higher Secondary (Class XII / PUC) examinations.

MES Kishore Kendra Public School

ICSE • Banglore, Karnataka 03/2022

Achieved 94% in the Class X ICSE board examinations.

Skills

Python, SQL, Java, Git, GitHub, DSA, Object Oriented Programming, HTML5, CSS, Generative AI , AI Fluency, Generative AI Tools , Prompt Engineering, REST API, Mobile Application Development , SDLC, Web Development, CI/CD, DEVOPS(Docker and Kubernetes), Cloud Services, Testing, ReactJS, Javascript, AngularJS, NodeJS

Experience

FlyRankAI

ML Intern • Remote 07/2026 - 09/2026

- Selected a specialized Machine Learning track and completed structured technical assignments focused on practical ML workflows and model development.
- Fine-tuned machine learning models using real-world company data, applying data analysis and experimentation techniques to evaluate model performance.
- Performed exploratory data analysis to examine data patterns, derive insights, and support model development and evaluation.
- Utilized a notebook-based development environment to implement, test, and document machine learning experiments as part of a structured internship program.

1Stop

Full Stack Web Developer Intern • Remote 03/2025 - 04/2025

Full-Stack Web Development Intern | 1Stop
Remote Internship

- Completed structured training in full-stack web development, covering HTML, CSS, JavaScript, Node.js, Express.js, React, Angular, and Git.
- Applied frontend development concepts to build a single-page website using web technologies.
- Worked on a Laravel-based Task Manager application involving REST APIs and Postman for API testing.
- Explored full-stack application development through a Room Booking Management System project, gaining exposure to application architecture and development workflows.

1Stop

Machine Learning Intern • Remote 03/2025 - 04/2025

- Completed structured training in Machine Learning, covering data analysis, preprocessing, visualization, and model development.
- Applied data preprocessing and exploratory data analysis techniques to prepare datasets and identify patterns for machine learning tasks.
- Explored regression and clustering techniques to address predictive modelling and unsupervised learning problems.
- Worked on practical ML projects involving diabetes prediction, human action detection, order volume prediction, and bike-sharing demand forecasting.
- Gained hands-on experience with the machine learning workflow, from data preparation and visualization to model building and evaluation.

1Stop

Artificial Intelligence Intern • Remote 03/2025 - 04/2025

- Completed structured training in Artificial Intelligence, covering AI fundamentals and practical applications through guided assignments and project sessions.
- Explored text classification using TensorFlow, applying machine learning concepts to text-based prediction tasks.
- Worked on computer vision projects involving object detection, pet-face classification, and landmark detection using TensorFlow.
- Gained hands-on exposure to AI model development, experimentation, and project implementation through guided internship assignments.

Projects

CampusForge — Campus Collaboration Platform
Technologies: React, TypeScript, Firebase, Expo, React Native, ExpoGo, JavaScript, Docker

- Developed a campus-focused platform designed to help students collaborate, share information, and engage with their university community.
- Worked with Firebase for backend services and integrated modern frontend technologies to support an interactive user experience.
- Explored cross-platform application development using React Native and Expo.

RePlate — Surplus Food Marketplace

Technologies: Next.js, TypeScript, Supabase, CSS

- Developed a marketplace concept connecting food businesses with customers to make surplus food available at reduced prices and help minimize food waste.
- Implemented database-backed listing workflows and user-facing features using Supabase.
- Worked on database migrations, application data management, and backend integration to support marketplace functionality.

Diabetes Prediction System

Technologies: Python, Machine Learning, Data Preprocessing, Model Evaluation

- Developed a machine learning project to predict diabetes risk using health-related input data.

- Applied data preprocessing and model-building techniques to prepare datasets and generate predictions.
- Explored model evaluation methods to assess predictive performance.

Machine Learning Projects — 1Stop

Technologies: Python, TensorFlow, Machine Learning

- Explored supervised and unsupervised learning techniques, including regression, clustering, and classification.
- Worked on guided projects involving text classification, object detection, landmark detection, and bike-sharing demand forecasting.
- Applied preprocessing, visualization, and model-building concepts through structured practical assignments.

Task Manager Web Application

Technologies: HTML, CSS, JavaScript, AngularJS, Laravel, REST APIs, Postman

- Worked on a web-based task management application as part of a structured Full-Stack Web Development internship.
- Explored backend integration using Laravel and REST APIs, with Postman for testing API requests and responses.
- Applied frontend development concepts to build user interfaces and understand end-to-end web application workflows.

Certificates

Python Foundation Certification, TechA Java Developer Certification, AI Fluency: Frameworks and Foundation, Full Stack Developent

---

Languages

English, Hindi, Kannada, Telugu
